# Modern Apps
Powered by Process

Modernize operations with end-to-end automation, AI, and low-code apps

Bizagi, a Cloud-native Low-Code Automation Platform

Bizagi is a cloud-native PaaS that allows you to modernize and optimize your business through the creation of low-code Applications using automated processes as the backbone. Bizagi brings together the best of both worlds by allowing users to quickly design and develop custom applications, maintaining all the benefits of process automation while orchestrating multiple systems and providing an AI assistant that delivers true business agility.

Why Choose Bizagi?

Intuitive
Bizagi offers an easy-to-use, low-code design approach for all users. The AI assistant provides self-service business analytics from day one.

Unifying
Create applications and processes that bring together your employees, processes, systems, data, bots, and AI.

Comprehensive
Create applications and automate processes for all parts of your business.

Powerful
Cloud-native PaaS with robust security, integration, orchestration, and work management features.

The Bizagi Platform

1. Low-Code Apps

Bizagi Apps is the easiest way to create robust enterprise apps with built-in governance to meet the needs of the modern enterprise. Bizagi Apps' architecture is based on reusable elements that provide both operational standardization and a composable architecture to enable rapid change.

1 Compose App

2 Customize UI / UX / Extend Components

3 Publish App

2. Powerful and Secure AI Assistant

Elevate your business potential with Bizagi's AI assistant, **Ada**. Ask Ada empowers you to enhance decision-making and grasp the intricacies of your data effortlessly through natural language understanding. Harness the power of conversational analytics to swiftly surface actionable insights, enabling rapid, well-informed decisions like never before.
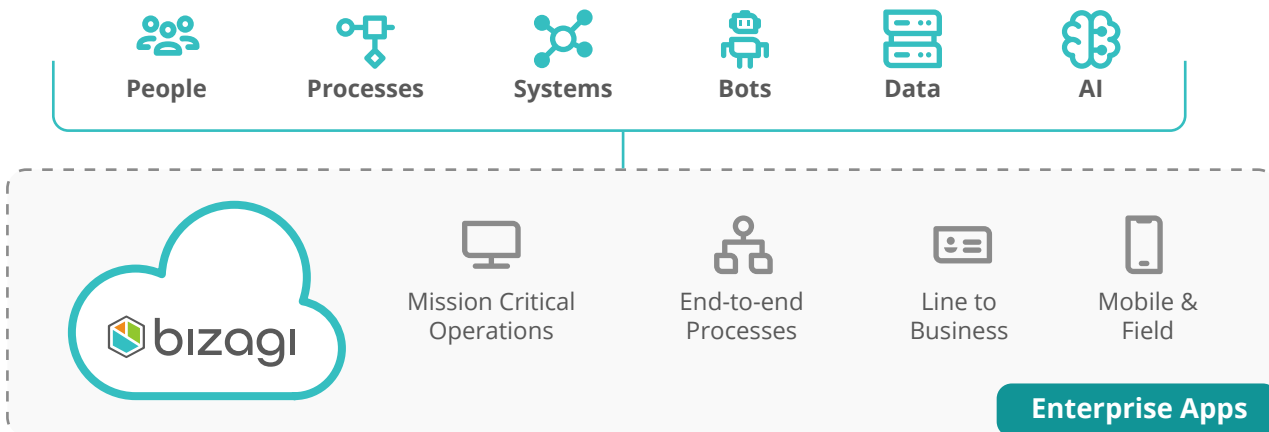

3. Process Automation

Analyze, optimize, and automate your workflows to achieve unparalleled visibility into operations across your entire organization, all while enhancing efficiency. With our intuitive low-code interface, automate any process in just seven simple steps, empowering you to streamline operations effortlessly. Plus, built-in governance procedures guarantee compliance with regulations, providing peace of mind as you revolutionize your workflows.

Define Forms

Business Rules

4. Enterprise Orchestration

Complete the most advanced integrations in your projects to provide a unified experience for employees and customers, shield users from upgrades or system replacements, and create business agility, accountability, and transparency. Use any ready-to-use **connectors** or **widgets** to customize and connect your App with multiple external systems, and when required, build your own with our assistants. Our neutral approach allows you to include AI, RPA bots, OCR, or even different SAP systems independently of their versions or vendors.
