Data Mesh: Game Changer or Just Hot Air? Is data mesh a sustainable approach to data responsibility in the business

Detailed results

For internal use only

Data Mesh: Game Changer or Just Hot Air?

Single Analysis

To what extent do you agree with these statements?

We could benefit from more effective means of collecting and documenting expert knowledge about our data.

Business users require a higher level of data & analytics empowerment.

Data is a revenue driver.

An increasingly distributed data & application landscape requires a more distributed approach to data & analytics.

Data governance is a tedious obligation and a limiting factor.

Central D&A-teams lack business domain expertise, which is a risk to data & analytics assets.

There is so much duplication of data and analyses in our organization that I don't know what I can rely on.

The value of data is sufficiently transparent, we know what data is used by whom and for what purpose.

Central D&A-teams do not scale.

I can find relevant data quickly and easily.

Strongly agree Mostly agree Mostly disagree

Strongly disagree

BARC

Which of these measures are relevant for your company to improve the quality of its data & analytics-assets?

Serve source data as data ready for consumption

Establish a feedback loop from data consumers to data producers to support continuous improvement of data products

Serve source data with a description of the expected quality

Monitor and improve the usefulness of D&A assets

Apply product thinking to D&A assets

Monitor usage and success of data products and ensure an appropriate balance in cost/benefit terms

Actively phase out data products that are not used or not successful

Relevant and being done

Relevant and planned

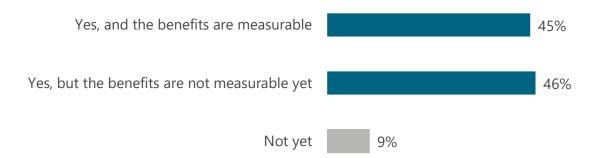

Relevant but not planned

Of little or no relevance
